Oplossing voor onder een raam

Kan uw keukenraam in onvoldoende mate of helemaal niet worden geopend omdat uw keukenkraan in de weg staat ?
Geen probleem met de raamoplossing.

Solution pour dessous de fenêtre

La fenêtre de votre cuisine ne s'ouvre-t-elle que partiellement ou pas du tout car votre robinet la gêne ?
La réponse : le robinet pour dessous de fenêtre.

Gebruiksaanwijzing voor lagedruk mengkranen | Utilisation des mitigeurs basse pression

Bij het openen van de kraan komt er altijd eerst warm water uit
 Bij het sluiten van de kraan blijft deze nog nadruppen
 A l'ouverture, le mitigeur donne toujours de l'eau chaude.
 A la fermeture, le robinet continue de couler pendant un certain temps.

De waarborg geldt enkel voor productiefouten.
De garantie treedt in op datum van factuur en deze dient voorgelegd te worden bij elke aanvraag tot tussenkomst.
De slijtagestukken vallen uiteraard niet onder deze waarborg (dichtingen, neoperls,...). De waarborg beperkt zich uitsluitend tot het vervangen of herstellen van het defecte stuk.
De waarborg dekt geen verplaatsingskosten, noch eventuele schade.
Om tussenkomst van onze technische dienst mogelijk te maken is het noodzakelijk dat de kraan bereikbaar blijft zonder dat het meubel dient gedemonteerd te worden.

La garantie couvre exclusivement les vices de fabrication. La garantie part de la date de facture au client bénéficiaire et doit toujours être présentée lors de toute demande d'intervention.
Les pièces d'usure n'entrent pas dans le cadre de cette garantie (joints, mousseurs,...). La garantie se limite au remplacement ou à la réparation de la pièce défectueuse.
La garantie ne couvre aucun frais, ni de déplacement, ni les dégâts éventuels. Pour permettre l'intervention de notre service après-vente, il est indispensable que le robinet reste accessible sans aucun démontage d'une partie du meuble c.à.d. que la fixation du robinet et les raccords à l'eau soient visibles et accessibles.

Garantieperiode (in jaren) / Durée de la garantie (en années)

5	Keramisch binnenwerk voor ééngreepsmengkraan Cartouche de commande de mitigeurs à disques céramique
2	Bovendeel met keramische schijven van mengkranen - Thermostatisch binnenwerk Tête de mélangeurs à disques de céramique - Cartouche thermostatique
1	Kleurbehandeling - Onder voorbehoud van gebruik van bijtende- of agressieve producten. Traitement couleur - Sous réserve de non emploi de produits abrasifs ou corrosifs
/	Verbindingsslangen, sproeiers, Neoperl, dichtingen : zonder enige garantie Flexibles - douchettes - mousseurs - joints : sans aucune garantie

Onderhoudsvoorschriften

De kranen zijn eenvoudig in onderhoud. Het volstaat ze af en toe eens met een zachte doek of zacht spoelmiddel af te wrijven.
Gebruik nooit agressieve of schurende reinigingsmiddelen (schuurcreme, produkten met amoniak, antikalk middelen, produkten met alcohol).
Goede raad om de kraan te beschermen : aangezien kalk lelijke vlekken achterlaat, raden wij U aan uw kraan na gebruik af te drogen met een zachte doek of zeemvel. De nikkelkranen dienen regelmatig ingewreven met parafine-olie (beschikbaar in de drogisterij). Voor andere oppervlakken is een onderhoudswas voor auto's zonder toevoeging van polijstingsprodukten voldoende

Onderhoud van kranen in inox look

De kleur RVS look is een legering van nikkel en zilver.
Kalksporen op de kraan verwijdt u best met wat azijn op een zachte doek en nadien goed spoelen met water en droogwrijven met een zachte doek. Andere vlekken (donkere/zwarte vlekken) moet u verwijderen met een produkt om zilver op te poetsen (bv Sidol) produkten verkrijgbaar in alle warenhuizen en drogisterijen. Net zoals men doet met zilverwerk : kraan met behulp van zachte doek inwrijven met Sidol, en nadien met propere zachte doek opblinken. Om dit soort behangelingen te voorkomen : kraan droogwrijven na elk gebruik.

Conseils pour l'entretien

Les robinets sont faciles d'entretien. Les frotter de temps en temps avec un chiffon ou un produit de vaisselle doux suffit pour les faire briller comme au premier jour. Veillez à ne jamais utiliser des produits d'entretien corrosifs ou abrasifs (crème à récurer, produits ammoniacés, produits anticalcaires, produits avec de l'alcool).
Les conseils pour protéger cette robinetterie : le calcaire laissant de vilaines taches, nous vous recommandons d'essuyer votre robinet après usage avec un chiffon doux ou une peau de chamois.
Sur les surfaces en exécution nickel mat nous vous recommandons d'appliquer régulièrement un film d'huile de paraffine (disponible dans les drogueries). Pour les autres finitions, utilisez une cire d'entretien pour automobile sans adjonction de produits de polissage.

Entretien des robinetteries en look inox

Le traitement look inox est réalisé par un alliage de nickel et d'argent.
Si vous avez des taches de calcaire grisâtres sur le robinet, il suffit de le frotter avec un chiffon imbibé de vinaigre et ensuite de bien le rincer avec de l'eau. Ensuite, le sécher avec un chiffon doux. Les taches plus foncées s'enlèvent avec un produit d'entretien pour l'argenterie (par ex. Sidol), produits disponibles dans toutes les grandes surfaces ou drogueries.
Ensuite le polir comme on fait pour l'argenterie. Pour éviter ces opérations, essuyer votre robinet après l'usage.
